# Luis Enrique Pérez Señalin

+593 995748422 • luis.perez05@epn.edu.ec • Linkedin@Luis Enrique Perez Señalin • Github@enriqueperez21

## Education

**Escuela Politécnica Nacional** — Ecuador, Quito
Computer Science Engineering — In progress

### Certifications

- Azure Fundamentals AZ-900
- HarvardX CS109xa Machine Learning and AI with Python
- GIT Git-hub Coursera: Atlassian University

## Experience

**Kamina** – Software Engineer — October, 2025 – September, 2026

- Designed and maintained database schema changes using Alembic (Python/FastAPI) and Liquibase (Java/Springboo), adding new fields and keeping data consistent across deployments.
- Built automated data pipelines to CleverTap (customer engagement platform), including event-driven sends triggered by backend actions and scheduled daily CronJobs for monthly credit-bureau data updates.
- Modified and maintained AWS Lambda functions that extract data and load it into the database on a schedule; worked with S3 and AWS Secrets Manager for secure credential and file handling.
- Developed and optimized queries, repository interfaces and DTOs in Java Spring Boot, modifying services and query files for a credit platform serving merchants and end users.
- Integrated and connected multiple servers (FastAPI service, Spring Boot admin and master services), enabling data exchange across systems.
- Built complete features end-to-end (endpoints, services, data layer) on top of the existing codebase, after fully mapping the data flow of the platform. Example: Integrate a payment method called SafetyPay to Angular/Java Springboot using a previous created backend in FastAPI.
- Reviewed server logs to debug production errors and data inconsistencies in the FastAPI service.

**Technologies**: PostgreSQL, Python FastAPI, AWS, Alembic DB Migrations, Java Spring Boot, Angular, Scrum Methodology

**GMS Information Security** – SOC Intern — April, 2025

- Developed an automation system for generating security breach reports with automatic delivery.
- Performed security incident analysis and immediate notification to respective system administrators.

  **Technologies:** Python, Docker, MicrosoftGraphQL.

**Clear Minds Consultores** – Software Development Intern June, 2023 – September, 2023

- Developed mobile applications using React Native and backend services with Firebase for a restaurant app.

  **Technologies:** Javascript, React Native, API's.

## Skills & Projects

**Technical Skills:** Web and mobile application development. Backend development with SQL and NoSQL databases. General-purpose programming with Python, including file management. Docker usage for packaging functional applications.

**Projects:** MERN Web Page, Python "Game of Life" with GUI, Mobile application with React Native

**Portfolio:** https://github.com/enriqueperez21/portfolio

## Events & Participation

**PWNORDIE 2025** – Cybersecurity Talk Ecuador, Quito - July 2025
**Cybersecurity Bank & Government Ecuador 2025 -** Cybersecurity Talk Ecuador, Quito - June 2025
**Interact2Hack -** USFQ Hackaton Ecuador, Quito - March 2025
